

# Exocrine Pancreatic Insufficiency (EPI) Market Overview And Statistic For 2024-2033

*The Business Research Company's  
Exocrine Pancreatic Insufficiency Global  
Market Report 2024 – Market Size,  
Trends, And Global Forecast 2024-2033*

LANDON, GREATER LONDON, UK, June 24, 2024 /EINPresswire.com/ -- The global market for exocrine pancreatic insufficiency (EPI) is witnessing robust growth, driven by factors such as increased awareness and diagnosis, a

growing prevalence of digestive disorders, an aging population, and pancreatic function decline. EPI, characterized by insufficient production or release of digestive enzymes by the pancreas, can lead to malnutrition and various digestive symptoms. The market is projected to grow from \$2.41 billion in 2023 to \$3.34 billion in 2028, at a compound annual growth rate (CAGR) of 6.5%.

## Rising Cases of Diabetes Fuel Market Growth

One of the key drivers of the EPI market is the rising incidence of diabetes. Diabetes, a chronic health condition characterized by inadequate insulin production or utilization, often requires pancreatic enzyme replacement treatment (PERT) to manage EPI. With the global diabetes cases expected to reach 1.3 billion by 2050, up from 529

million in 2022, the demand for PERT and related treatments is set to increase significantly, driving the growth of the EPI market.
