

Gavel's New AI Feature Instantly Turns PDFs Into Automated Workflows

Gavel introduces AI into its PDF automation product, allowing lawyers to instantly turn legal expertise into workflows that generate court or government forms.

LOS ANGELES, CA, UNITED STATES, June 25, 2024 /EINPresswire.com/ -- [Gavel](#), the automation infrastructure for the legal industry, today announced Gavel Blueprint for PDF, generative AI features for PDF documents that enable lawyers to instantly turn PDF documents into automated workflows. This is the second large-scale generative AI feature from the company, having launched its AI feature for Microsoft Word documents, [Gavel Blueprint for Word](#), in October 2023.

Legal professionals can load any documents into Gavel Blueprint.

“

Attorneys can approve or reject automated rules that the AI suggests, eliminating two key issues with AI in legal: hallucinations and unpredictable outcomes due to non-determinism.”

Dorna Moini

Gavel Blueprint for PDF empowers legal professionals in practice areas that involve PDFs, such as family law, probate, immigration, tax, conservatorships, guardianships, and bankruptcy.

Since the launch of the company's first AI feature, over 600 law firms have used AI for the first time in their practice using Gavel, making Gavel a stepping stone to AI adoption in the legal field.

“We started Gavel to give lawyers the power to scale their expertise to the public - while building hyper-profitable law firms,” said Gavel's CEO, Dorna Moini. “Generative AI has dramatically accelerated the pace at which we can empower our customers. This launch, coupled with our [PDF automation product](#) launch earlier this year, allows attorneys in PDF-heavy practice areas to participate in the legal technology revolution. Attorneys need AI

they can rely on and control. Gavel's infrastructure is constantly delivering the infrastructure to make them the #1 choice for their clients."

Critically, the Gavel Blueprint technology and interface leverage generative AI in a way that is both understandable and controllable for legal professionals. Gavel customers have full control over the source documents inputted into the system, meaning they can limit the universe of information it draws from. "Attorneys can approve or reject any automated rules that the AI suggests, eliminating two key issues with AI in legal: hallucinations and unpredictable outcomes due to non-determinism," said Moini.

Gavel Blueprint for PDF is now available to users on all pricing tiers, helping to ensure that all legal professionals have the tools they need to succeed in a rapidly evolving digital landscape. Gavel's continued enhancement of its suite of AI features reaffirm Gavel's commitment to innovation and excellence in legal technology.
