Traumatic brain injury (TBI) assessment is a process that involves evaluating a person's cognitive, physical, and emotional functioning following an injury to the brain caused by an external force. It typically involves a comprehensive examination conducted by medical professionals, such as neurologists, neurosurgeons, or emergency room physicians, aiming to determine the severity of the injury, identify areas of impairment, and guide treatment and rehabilitation efforts. The traumatic brain injury (TBI) assessment aims to understand the extent of the injury's impact on the individual's cognitive abilities, physical functioning, and emotional well-being to develop an appropriate management plan.
