company has come to Korea with its U.S. Patent Pending multifaceted intervention that works at the heart of the problem declared as a national emergency, while intervening in the world's first and fourth highest suicide rates in the world according to the World Health Organization (WHO) and the Organisation for Economic Co-operation and Development (OECD), respectively. The multifaceted intervention premised on leadership's grand theory, also can mitigate Korea's portion of the \$8.3 trillion global output problem due to low engagement, crisis in Korean hospitals, injustice, and a divided government.
