

Global Chemotherapy-Induced Anemia Market Growth Overview For 2024-2033

The Business Research Company's Chemotherapy-Induced Anemia Global Market Report 2024 – Market Size, Trends, And Forecast 2024-2033

LONDON, GREATER LONDON, UK, June 28, 2024 /EINPresswire.com/ -- The chemotherapy-induced anemia market has shown robust growth, expanding from \$2.4 billion in 2023 to \$2.6 billion

in 2024 at a CAGR of 8.4%. This growth is driven by increased cancer prevalence, expanded chemotherapy treatments, and an aging population with higher cancer incidence. The market is poised to grow to \$3.46 billion by 2028, at a CAGR of 7.4%, supported by advancements in oncology supportive care, rising healthcare expenditure, and personalized medicine.

Rising Prevalence of Cancer and Chemotherapy Driving Market Growth

The high prevalence of cancer and chemotherapy-induced anemia (CIA) are significant factors propelling market expansion. CIA occurs due to inflammation-induced iron deficiency, bone marrow disruption, and malignant tissue invasion, leading to blood loss.

Explore comprehensive insights into the chemotherapy-induced anemia market with a detailed sample report:

Major Players and Market Trends

Key players such as Pfizer Inc., Johnson & Johnson, and Novartis AG are focusing on developing oral treatments like oral HIF-PHI to enhance red blood cell production. For example, FibroGen Inc.'s roxadustat showed promising results in treating CIA, demonstrating efficacy in non-myeloid malignancies without the need for red blood cell transfusions.

Market Segments

- Anemia Types: Mild Anemia, Moderate Anemia, Severe Anemia, Life-Threatening Anemia
- Treatment Types: RBC Transfusion, Erythropoiesis-Stimulating Agents (ESAs), Iron Supplementation
- End-Users: Hospitals, Ambulatory Surgical Centers, Multispecialty Clinics, Cancer Research Centers, Cancer Rehabilitation Centers

Regional Insights: North America Leads, Asia-Pacific to Witness Rapid Growth

North America dominated the chemotherapy-induced anemia market in 2023, driven by advanced healthcare infrastructure and high healthcare expenditure. Asia-Pacific is expected to witness the fastest growth, supported by increasing cancer incidences and improving healthcare facilities.
