Definition:

E-Brokerage, short for electronic brokerage, refers to the provision of online platforms that

enable individuals and institutions to execute financial transactions, particularly buying and selling of securities such as stocks, bonds, options, and other investment products, through the internet. E-Brokerage platforms facilitate the electronic trading of financial instruments, allowing investors to access and manage their investment portfolios from anywhere with an internet connection.

Market Drivers:

- Exponential growth of digital technology
- The use of advanced analytics and artificial intelligence has enhanced decision-making processes

Market Opportunity:

- The democratization of financial markets
- The global reach of e-brokerage platforms enables investors to diversify their portfolios internationally

Market Challenges:

- Cybersecurity emerges as a formidable challenge
- Regulatory compliance adds another layer of complexity
