#### Definition:

A Quit Smoking App is a mobile application designed to assist individuals in their journey to quit smoking tobacco. These apps typically offer a range of features and tools to help users track their progress, manage cravings, and stay motivated throughout the quitting process.

#### Market Trends:

AI and big data personalize quit plans, while AR/VR and wearables enhance user support and real-time monitoring.

Feedback-driven improvements and behavior forecasting advance app features for better user engagement and success rates.

#### Market Drivers:

Awareness of smoking risks boosts quit smoking app adoption, driven by health concerns and rising costs.

Government support and smartphone prevalence increase app accessibility, promoting market growth and user adoption.

#### Market Opportunities:

Global smartphone usage expands app reach, especially in developing nations, while healthcare integration and insurance plans boost app credibility.

Content diversification to address lifestyle changes broadens app appeal, potentially attracting a wider health-conscious audience.

#### Market Leaders & Development Strategies:

On 15th February 2022, the World Health Organization today launched 'Quit Tobacco App' to help people stop using cigarette and give up use of tobacco in all forms, including smokeless and other newer products. The app, the first such by WHO, and the first that targets all forms of tobacco, helps users to identify the triggers, set their targets, manage cravings, and stay focused to quit tobacco. The 'WHO Quit Tobacco App', launched during WHO's year-long 'Commit to quit' campaign, is the latest tobacco control initiative by the WHO South-East Asia Region.
