

Hyperion Research Recognizes MyLegal™ as a MarketView™ Advanced Solution for Corporate Legal Departments

EL DORADO HILLS, CALIFORNIA, UNITED STATES, July

9, 2024 /EINPresswire.com/ -- El Dorado Hills-

based□Legal Automation Group, LLC, and its award-winning legal automation software MyLegal™, was recognized as a MarketView™ Advanced Solution in Hyperion Research, an Epiq company's, recently released MarketView™ Report on Low/No Code Workflow Automation for Corporate Legal Departments.

"

As one of the designated
MarketView™ Advanced
Solutions, MyLegal's Legal
Front Door and
Al/Automation platform will
play an important role in
that transformational effort"
Catherine J. Moynihan, Sr.
Director, Strategy at Hyperion
Research

This report is a comprehensive review of market trends and the leading automation solutions for corporate legal departments and details the emergence of automation as a top priority for corporate legal departments.

"The results from the report speak to the importance that automation will play in the digital transformation of the corporate legal department. As one of the designated MarketView™ Advanced Solutions, MyLegal's Legal Front Door and Al/Automation platform will play an important role in that transformational effort," explained Catherine J.

Moynihan, Sr. Director, Strategic Intelligence & Advisory at Hyperion Research.

MyLegal received special recognition as a Market Leader for its Process Administration capabilities. Additionally, MyLegal received a Highly Innovative designation for its Realtime Process Visibility.

PROCESS ADMINISTRATION: Leveraging the power of an enterprise-grade business process automation platform under the hood, MyLegal provides strong, role-based design, security, and process management.

REALTIME PROCESS VISIBILITY: Administrators have visibility into in-flight processes (e.g., steps taken, current status, etc.) enabling adjustments on the fly.

"We couldn't be any happier with the results of the report," commented MyLegal CEO, Jim Tate.

"The attributes which the report recognizes as market leading, are instrumental to the success of an effective automation initiative. Process Administration highlights our ability to build and administer highly complex process solutions that other platforms are likely to have trouble with. Meanwhile, Realtime Process Visibility underscores the importance of being able to manage potentially hundreds, if not thousands, of running instances of a workflow, while in-flight."

Tate added, "Many tools can build simple automated workflows, improving productivity, at least initially, however, because these solutions are not based on an enterprise-grade platform like MyLegal, clients struggle to manage after deploying just a few applications."
