

Global Wildlife Health Market Overview and statistic For 2024-2033

The Business Research Company's Wildlife Health Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, July 4, 2024 /EINPresswire.com/ -- The wildlife health market size has seen rapid growth in recent years, expanding from \$2.26 billion in 2023 to

\$2.51 billion in 2024 at a compound annual growth rate (CAGR) of 11.3%. This growth in the historic period can be attributed to factors such as habitat destruction, increased availability of wildlife veterinary care facilities, and advancements in delivering medicines for animals in sanctuaries and zoos. The market is expected to continue its upward trajectory, reaching \$3.7

billion by 2028 with a CAGR of 10.2%. Forecasted growth drivers include rising demand for animal health products, regional prospects, and strategic initiatives by industry leaders.

Rising Demand for Wildlife Conservation Drives Market Growth

The wildlife health market is poised for rapid expansion, driven by growing global collaboration in disease

surveillance, data analytics, and artificial intelligence. Major trends in the forecast period include increased wildlife conservation measures and funding activities, aimed at preserving biodiversity and sustainable wildlife management. For instance, substantial funding allocations by governmental bodies such as the United States Department of the Interior underscore the market's pivotal role in supporting conservation efforts.
