

Gastroesophageal Junction Adenocarcinoma Market Size in the 7MM is expected to grow by 2032 | DelveInsight

*Gastroesophageal Junction
Adenocarcinoma Market*

DELHI, DELHI, INDIA, July 5, 2024
/EINPresswire.com/ -- DelveInsight's
"Gastroesophageal Junction
Adenocarcinoma Market Insights,
Epidemiology, and Market Forecast —
2032" report delivers an in-depth
understanding of the
Gastroesophageal Junction
Adenocarcinoma, historical and
forecasted epidemiology as well as the
Gastroesophageal Junction
Adenocarcinoma market trends in the
United States, EU4 (Germany, Spain, Italy, France) and the United Kingdom, and Japan.

Gastroesophageal Junction Adenocarcinoma Market
Size

Key Takeaways from the Gastroesophageal Junction Adenocarcinoma Market Research Report

- The increase in Gastroesophageal Junction Adenocarcinoma Market Size is a direct consequence of the increasing patient population and anticipated launch of emerging therapies in the 7MM.
- As per DelveInsight analysis, the Gastroesophageal Junction Adenocarcinoma market is anticipated to witness growth at a considerable CAGR.
- The leading Gastroesophageal Junction Adenocarcinoma Companies working in the market include Daiichi Sankyo, AstraZeneca, AskGene Pharma, Inc., Jiangsu Aosaikang Pharmaceutical Co., Ltd., Akeso, RemeGen Co. Ltd, Genome & Company, Merck, Eli Lilly and Company, EMD Serono, Merck Sharp & Dohme LLC, Gilead Sciences, MedImmune LLC, Gracell Biopharmaceuticals Inc., Hoffmann-La Roche, LianBio LLC, and others.
- Promising Gastroesophageal Junction Adenocarcinoma Pipeline Therapies in the various stages of development include Trastuzumab deruxtecan, Ramucirumab, Paclitaxel, ASKB589,

Oxaliplatin, Capecitabine, Cadonilimab, AK117, Oxaliplatin, Toripalimab, and others.

- April 2024: RemeGen Co. Ltd announced a study of Phase 2 & 3 clinical trials for Disitamab Vedotin Injection, Cadonilimab Injection, and Paclitaxel Injection. The purpose of this study is to evaluate the efficacy and safety of Disitamab Vedotin Combined with Cadonilimab in subjects with HER2-expressing locally advanced or metastatic gastric cancer and gastroesophageal junction adenocarcinoma after progression on first-line therapy.
- April 2024: Peking University announced a study of Phase 1 clinical trials for Claudin18.2-Targeted Chimeric Antigen Receptor T Cell Injection. This study is an open-label, single-/multiple-dose infusion, adaptive dose-escalation designed early exploratory clinical trial aiming to evaluate the safety, tolerability, and efficacy of Claudin18.2-Targeted Chimeric Antigen Receptor T Cell Injection in subjects with CLDN18.2 positive and pathologically confirmed locally advanced or metastatic gastric/gastroesophageal junction adenocarcinoma.
- April 2024: Merck Sharpy & Dohme LLC announced a study of Phase 3 clinical trials for Pembrolizumab and Cisplatin. The study will compare the efficacy and safety of pembrolizumab plus trastuzumab in combination with standard of care (SOC) chemotherapy versus trastuzumab in combination with SOC chemotherapy in participants with HER2-positive gastric cancer. The primary hypotheses of the study are that pembrolizumab plus trastuzumab in combination with chemotherapy is superior to trastuzumab plus chemotherapy in terms of 1) progression free survival (PFS) per Response Evaluation Criteria in Solid Tumors 1.1 (RECIST 1.1) as assessed by blinded independent central review (BICR), and 2) overall survival (OS).
- April 2024: Phanes Therapeutics announced a study of Phase 1 & 2 clinical trials for PT886, Paclitaxel, Gemcitabine and Abraxane. This is a first-in-human, Phase 1/2, open-label, dose escalation and dose expansion and combination study designed to evaluate the safety, tolerability, pharmacokinetics, pharmacodynamics, and preliminary efficacy of PT886. Patients with the following tumor types will be eligible for screening: unresectable or metastatic gastric adenocarcinoma, gastroesophageal junction (GEJ) adenocarcinoma, and pancreatic ductal adenocarcinoma (PDAC).
- April 2024: AstraZeneca announced a study of Phase 3 clinical trials for AZD0901, Ramucirumab+ paclitaxel, Paclitaxel, Docetaxel, Irinotecan, TAS-102, and Apatinib. The purpose of this study is to measure the efficacy and safety of AZD0901 compared to Investigator's choice of therapy as 2L+ treatment for participants with advanced or metastatic gastric or GEJ adenocarcinoma expressing CLDN18.2.

Gastroesophageal Junction Adenocarcinoma Overview

Gastroesophageal junction adenocarcinoma is a type of cancer that occurs where the esophagus (the tube that carries food from the throat to the stomach) joins the stomach. This area is known

as the gastroesophageal (GE) junction. Adenocarcinoma refers to a cancer that begins in glandular tissue, which is tissue that secretes substances inside and outside the body. The cells in these glandular tissues undergo malignant changes, leading to the development of cancer.

Gastroesophageal Junction Adenocarcinoma Epidemiology Insights

The epidemiology section of Gastroesophageal Junction Adenocarcinoma offers insights into both historical and current patient populations, as well as forecasted trends across seven major countries. This section aids in understanding the factors behind present and projected trends through analysis of various studies and input from key opinion leaders. Additionally, this portion of the market report provides information on the diagnosed patient pool, trends, and underlying assumptions.

Gastroesophageal Junction Adenocarcinoma Drugs Market

The Gastroesophageal Junction Adenocarcinoma Drugs Market is expected to witness substantial growth in the coming years as more targeted therapies receive regulatory approval and enter clinical practice. Additionally, ongoing research efforts aimed at better understanding the molecular mechanisms underlying Gastroesophageal Junction Adenocarcinoma signaling in Gastroesophageal Junction Adenocarcinoma are likely to uncover new therapeutic targets and further expand treatment options for patients.

Gastroesophageal Junction Adenocarcinoma Treatment Market Landscape

The Gastroesophageal Junction Adenocarcinoma treatment market landscape has witnessed significant advancements over the past years, with targeted therapies playing a crucial role in improving outcomes for patients. Among these targeted therapies, the emergence of Gastroesophageal Junction Adenocarcinoma has garnered attention in the medical community, presenting both challenges and opportunities in treatment strategies.

Gastroesophageal Junction Adenocarcinoma Market Outlook

The report's outlook on the Gastroesophageal Junction Adenocarcinoma market aids in developing a comprehensive understanding of historical, current, and projected trends. This is achieved by examining the influence of existing Gastroesophageal Junction Adenocarcinoma therapies, unmet needs, as well as drivers, barriers, and the demand for advanced technology. This section provides detailed insights into the trends of each marketed Gastroesophageal Junction Adenocarcinoma drug and late-stage pipeline therapy. It assesses their impact based on various factors such as annual therapy costs, inclusion/exclusion criteria, mechanism of action, compliance rates, market demand, patient population growth, covered patient segments,

anticipated launch year, competition with other therapies, brand value, and input from key opinion leaders. The analyzed Gastroesophageal Junction Adenocarcinoma market data are presented concisely through relevant tables and graphs to offer a clear overview of the market dynamics.

Gastroesophageal Junction Adenocarcinoma Drugs Uptake

The drug chapter of the Gastroesophageal Junction Adenocarcinoma report provides a comprehensive analysis of both marketed drugs and late-stage pipeline drugs for this condition. It delves into the details of clinical trials, pharmacological actions, agreements, collaborations, approvals, patents, and advantages, disadvantages of each drug, as well as the latest news and press releases related to Gastroesophageal Junction Adenocarcinoma.

Major Gastroesophageal Junction Adenocarcinoma Companies

Several Gastroesophageal Junction Adenocarcinoma Companies working in the market include Daiichi Sankyo, AstraZeneca, AskGene Pharma, Inc., Jiangsu Aosaikang Pharmaceutical Co., Ltd., Akeso, RemeGen Co. Ltd, Genome & Company, Merck, Eli Lilly and Company, EMD Serono, Merck Sharp & Dohme LLC, Gilead Sciences, MedImmune LLC, Gracell Biopharmaceuticals Inc., Hoffmann-La Roche, LianBio LLC, and others.
