The rise in the number of employment resulted in busy and hectic schedules. The busy lifestyle of the consumers resulted in higher adoption of dishwashers as the consumers do not have enough time to invest in the regular household chores. Moreover, rise in the female working population have significantly boosted the sales of

the dishwashers especially in the developed markets and a similar trend is expected to be witnessed in the developing markets. Further, increase in number of nuclear families has exponentially boosted the demand for the dishwasher market. Portable dishwashers perfectly

serves the budget limitations, space limitations, and effective dish cleaning needs of the small families.

In recent times, women empowerment has increased significantly in every sector, which results in every consumer looking for an easy life considering a daily task. Cleaning dishes manually includes gel, power, and scrubbing; however, the dishwasher makes this task easy. This fast moving life has created a big opportunity for dishwasher in the market.

In recent times, rise in number of small-sized foodservice entities across the world drives the consumption of dishwasher as foodservice industry is experiencing rapid growth across the globe. Foodservice entities refer to those companies, businesses, institutions, and organizations that prepare meal and serve them to the consumers or customers. Foodservice entities include restaurants, catering units, hotels, cafeterias, and similar other units, which are the major end-users of dishwasher. Apart from this, rapid urbanization has led to an expansion in modern retail formats such as departmental stores, multiband stores, wholesalers, specialty stores, and online retails, which contributes toward an increase in the global sales of dishwashers, thereby driving the growth of the dishwasher market globally.

In addition, the rapid expansion of the retail industry plays a major role in the distribution of goods. Multi-brand specialty stores have many brands for the single lineproduct segment, where people can compare their features and colors, which help them to take buyingdecisions. In 2019 and 2018, more than 8 million units of the dishwashers were sold in the U.S. market.

According to the dishwasher market analysis, based on the product type, the built-in dishwashers accounted for 68.6% of the global dishwasher market share in 2020. This is primarily due to the higher adoption of built-in dishwashers in the households and commercial spaces of developed markets. As per the dishwasher market forecast, based on the application, the households segment is the dominating segment and is projected to be the fastest-growing segment owing to the surge in adoption of technologically advanced and cost-effective dishwashers.
