Increasing Number of Smokers Drives Market Growth

The increasing number of smokers is a significant factor contributing to the growth of the myocardial infarction market. Cigarette smoke contains chemicals that cause blood to thicken and clot, leading to myocardial infarction. For instance, according to the Office for National Statistics, in September 2023, the percentage of current smokers

among the UK population aged 25 to 34 years increased to 16.3%, up from 15.8% the previous year. This rise in smoking prevalence is expected to propel market growth.

Key Players and Market Trends

Major companies operating in the myocardial infarction market include Pfizer Inc., Johnson & Johnson Services Inc., F. Hoffmann-La Roche Ltd., Bayer AG, Novartis AG, and Sanofi SA, among others. These companies are focusing on developing advanced devices and technologies to enhance patient care and management.

For instance, Abiomed received FDA approval for its Impella RP Flex with SmartAssist in October 2022. This device, implanted via the internal jugular vein, features dual-sensor technology for optimal patient management and is designed for native heart recovery.

Segments:

- Drug Class: Antiplatelet Agents, Glycoprotein IIb/IIIa Inhibitors, Antithrombotic Agents, Beta-adrenergic Blockers, Vasodilators, Angiotensin-converting Enzyme (ACE) Inhibitors, Angiotensin-receptor Blockers, Analgesics, Thrombolytics
- Route Of Administration: Oral, Injectable
- Distribution Channel: Hospital Pharmacies, Retail Pharmacies, Online Pharmacies
