Surge in prevalence of mouth ulcers due to rise in tobacco consumption, chemical-based toothpaste, smoking cessation, and acidic foods and increase in dental and oral hygiene awareness drive the growth of the global mouth ulcers treatment market. However, lack of awareness and availability of traditional substitutes hinders the market growth. On the other hand, innovative product launches present new opportunities in the coming years.

Covid-19 Scenario:

The demand for mouth ulcers treatment increased during the pandemic due to weakened immune system with lack of sufficient amount of vitamins and minerals in patients suffered from the Covid-19 disease.

However, non-urgent surgeries were postponed to take care of increase in number of patients suffering from Covid-19 infection. Hospital staff was relocated in Covid wards and only urgent surgeries were performed.

The report offers detailed segmentation of the global mouth ulcers treatment market based on drug class, formulation type, indication, and region.
