Increase in adoption of GIS for facilities management, integration of GIS with mainstream technologies for business intelligence, rise in demand for GIS software for smart cities development, and urban planning have fueled the growth of the global GIS software Market. Adoption of advanced technologies such as AR, VR, and IoT for GIS, emerging technologies such as geospatial AI, and development of 4D GIS Software have created a number of opportunities in the market.

The image shows the cover of a market research report. On the left, a hand holds a small globe of the Earth. On the right, the report title is displayed: "GEOGRAPHIC INFORMATION SYSTEM (GIS) SOFTWARE MARKET OPPORTUNITIES AND FORECAST, 2020 - 2030". Below the title, it states: "Geographic information system (gis) software market is expected to reach **\$25.5 Billion** in 2030" and "Growing at a **CAGR of 15.2%** (2021-2030)". The Allied Market Research logo is in the top right corner.

Geographic Information System (GIS) Software Market

The geographic information system software market is segmented on the basis of component, type, function, Industry vertical, and region. Depending on component, the market is divided into software and services. On the basis of type, it is segregated into desktop GIS, server GIS, developer GIS, mobile GIS, and others. As per the function, it is fragmented into mapping, surveying, location-based services, navigation & telematics, and others. By industry vertical, it is classified into automotive, energy and utilities, government, defense and intelligence, smart cities, insurance, natural resources, others. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on the type of GIS software, the desktop GIS segment held the highest market share in 2017, contributing to nearly two-fifths of the total market. Being the most commonly used GIS solution, it has got all the basic functionalities of GIS, which in turn, has worked as the prime driving factor behind its growth. Simultaneously, the others segment is anticipated to grow at the highest CAGR of 13.8% during the forecast period. The report also offers insights on server GIS, developer GIS, and mobile GIS.

Based on end-user, the transportation and logistics segment accounted for nearly one-fifth of the total market in 2017 and is anticipated to remain dominant by 2025. Increase in adoption of advanced technologies such as connected cars, advanced telematics, and navigation systems has spurred the growth. Simultaneously, the agriculture segment is projected to grow at the highest CAGR of 14.0% during the study period.

Based on region, North America contributed to more than one-third of the total market in 2017 and is expected to dominate throughout the forecast period. The factors contributing to the highest share of this market in the region include large amount of data generated everyday by multiple organizations and adoption of advanced technologies as well as digitalization.

The key market players analyzed in the report include Autodesk, SuperMap, Trimble, ESRI, Hexagon AB (Intergraph), Pitney Bowes, Caliper, Computer Aided Development Corporation Limited (Cadcop), General Electric Co., and Bentley System. They have adopted several high-end strategies and have become successful in retaining their stronghold in the industry.
