textural issues, and skin tightening, for those who wish to avoid more invasive surgeries, marking a significant advancement in cosmetic treatments.

Genius® RF is a microneedling treatment that utilizes radiofrequency energy to stimulate collagen and elastin production. GeniusRF is renowned for its precision and ability to deliver energy at the optimal depth. Key advantages include customized treatments tailored to

individual needs, enhanced by real-time feedback.

LaseMD Ultra™ transforms skin rejuvenation with its advanced, non-ablative, fractionated technology. This customizable system treats a range of skin issues, specifically targeting the face, neck, and décolletage. LaseMD Ultra™ is celebrated for its fast and consistent results with little to no downtime. It can be used on more diverse skin types, unlike other RF devices and lasers.

"TotalSkin packages are allowing us to help people with melasma, acne scarring, and sun damage (even on people with darker skin tones) at Examined Life," says Dr. Kathryn Brokus. "This combination of Genius® RF and LaseMD Ultra™ technologies enables us to offer a comprehensive approach to skincare. These treatments are not just about addressing skin issues; they're about enhancing well-being and confidence. Our goal is always to help our patients not only look their best but feel their best, too."
