Invisalign treatment involves a series of clear, custom-made aligners that gradually move teeth into their desired positions. These aligners are made from a smooth, clear plastic that is comfortable to wear and gentle on the gums

and cheeks. Patients switch to a new set of aligners approximately every two weeks, allowing for gradual and precise tooth movement.

One of the key advantages of Invisalign is its nearly invisible appearance. Unlike traditional braces, Invisalign aligners are clear and discreet. Additionally, the aligners can be easily removed, allowing patients to enjoy their favorite foods and maintain good oral hygiene with ease.

At Exeter Smiles, patient care is the top priority. The team is dedicated to providing personalized treatment plans and comprehensive care throughout the Invisalign journey. In addition to Invisalign, Exeter Smiles also offers traditional braces in Allentown for only \$3,995.
