

Global Food Pathogen Detection Technology Market Size, Share And Growth Analysis For 2024-2033

The Business Research Company's Food Pathogen Detection Technology Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LANDON, GREATER LANDON, UK, July 19, 2024 /EINPresswire.com/ -- The food pathogen detection technology market has experienced robust growth in recent years, expanding from \$5.53 billion in 2023 to \$5.96 billion in 2024 at a compound annual growth rate (CAGR) of 7.8%. The growth in the historic period can be attributed to increase in global outbreaks of foodborne illnesses and globalization of food trade.

Major Players And Market Trends

Key players in the food pathogen detection technology market include Biomérieux SA, Merck KGaA, Bio-Rad Laboratories, Inc., 3M Company, Qiagen N.V., Pall Corporation, Hygiena, LLC, Romer Labs.

Major companies operating in the food pathogen detection technology market are focused on introducing technological innovations to gain a competitive edge in the market. Technological innovation in food pathogen detection technology refers to the development and use of new technologies to improve the detection of foodborne pathogens.

Segments:

- 1) By Technology: Traditional Food Pathogen Detection Technology, Rapid Food Pathogen Detection Technology
- 2) By Type Of Product: Consumables, Equipment
- 3) By Food Type: Meat & Poultry, Dairy, Processed Food, Fruits & Vegetables, Cereals & Grains

Geographical Insights: North America Leading The Market

North America was the largest region in the global food pathogen detection technology market in 2023. Middle East is expected to be the fastest-growing region in the forecast period. The regions covered in the food pathogen detection technology market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, Africa

Food Pathogen Detection Technology Market Definition

Food pathogen detection technology refers to a method where pathogens in agro-food are found by growing microorganisms on agar plates, followed by routine, precise serological and biochemical testing for identification. This technique is based on the capability of bacteria to grow and form colonies in agar media.

[Food Pathogen Detection Technology Global Market Report 2024](#) from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

[The Food Pathogen Detection Technology Global Market Report 2024](#) by The Business Research Company is the most comprehensive report that provides insights on food pathogen detection technology market size, food pathogen detection technology market drivers and trends, food pathogen detection technology market major players, food pathogen detection technology competitors' revenues, food pathogen detection technology market positioning, and food pathogen detection technology market growth across geographies. The food pathogen detection technology market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
