

Global Breast Imaging Devices Market Size, Share And Growth Analysis For 2024-2033

The Business Research Company's Breast Imaging Devices Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, July 19, 2024 /EINPresswire.com/ -- The breast imaging devices market has experienced robust growth in recent years, expanding from \$4.53 billion in

2023 to \$4.76 billion in 2024 at a compound annual growth rate (CAGR) of 5.1%. The growth in the historic period can be attributed to growth in the number of healthcare facilities, economic growth in emerging markets, rapid technological advances, the rising prevalence of breast cancer, and aging female population.

Growth Driver Of The Breast Imaging Devices Market

The rising prevalence of breast cancer is anticipated to contribute to the breast imaging device market's growth. A growing number of hormone replacement therapies (HRT), hormonal imbalances, menopause, and various reproductive disorders have significantly increased the risk of breast cancer. According to the World Health Organization (WHO), breast cancer is the most common cancer in women, impacting 2.1 million women annually. Breast cancer causes the

highest number of cancer-related deaths among women.
