With the rapidly evolving threat landscape, antivirus vendors face new and emerging challenges. The test report showcases how security products have adapted and enhanced their protection capabilities over the years.

Peter Stelzhammer, co-founder AV-Comparatives:

"Certification from AV-Comparatives stands as a critical benchmark in cybersecurity, providing an indispensable measure of assurance for enterprise protection. IT managers and CISOs must navigate an increasingly complex threat environment. By choosing solutions that have achieved our certification, they can be confident that these products have been scrutinised for performance and reliability, ensuring robust defence against a multitude of cyber threats.  AV-Comparatives' meticulous evaluation process is designed to endorse products not only for their ability to detect threats but also for maintaining system efficiency and minimising false positives—criteria that underpin operational integrity and business continuity."

What is included in the test report:

Real-World Protection Test:
This long-term test, which lasts four months, measures the ability of endpoint protection software to defend against Internet-based

threats.

Malware Protection Test:
This test evaluates the ability of the tested products to detect and handle malicious programs that may be encountered on company systems, such as on the local area network or external drives.

Performance Test:
The performance test ensures that the tested products do not compromise system speed in favour of providing protection.

False Positives Test:
A False Positives Test is conducted for each protection test to verify that the endpoint protection software does not generate a significant number of false alarms, which can be disruptive in business networks.

Product descriptions:
The report also includes product descriptions with the key features of each tested solution.

Like all AV-Comparatives' public test reports, the Enterprise & Business Endpoint Security Report is available universally and for free on https://www.av-comparatives.org
