Neither SHOOK nor Forbes receives any compensation in exchange for placement on its Top Financial Security Professionals (FSP) rankings, which are determined independently (see methodology). FSP refers to professionals who are properly licensed to sell life insurance and annuities. FSPs may also hold other credentials and licenses which would allow them to offer investments and securities products through those licenses. Ranking algorithm is based on qualitative measures learned through telephone, virtual, and in-person interviews to measure best practices, client retention, industry experience, credentials, review of compliance records, and firm nominations; and quantitative criteria, such as assets under management, sales figures, and revenue generated for their firms. Investment performance is not a criterion because client objectives and risk tolerances vary, and these professionals rarely have audited performance reports. Individuals must carefully choose the right FSP for their own situation and perform their own due diligence. SHOOK's research and rankings provide opinions intended to help individuals choose the right FSP and are not indicative of future performance or representative of any one client's experience. Past performance is not an indication of future results. For more information, please see [www.SHOOKresearch.com](http://www.SHOOKresearch.com). Council is an annual New York Life recognition program based on agent production from July 1-June 30.

The Million Dollar Round Table (MDRT), The Premier Association of Financial Professionals, is recognized globally as the standard of excellence for life insurance sales performance in the insurance and financial services industry.
