Growth Driver Of The Egg Freezing And Embryo Banking Market

The rise of social freezing is expected to propel the growth of the egg-freezing and embryo banking markets going forward. Social freezing refers to the process in which a woman

undergoes ovarian stimulation, egg retrieval, and freezing of her eggs for non-medical reasons. The rise of social freezing desire to preserve their fertility and have the option to have children later in life, often due to career, education, lack of a partner, or financial stability. Egg freezing and embryo banking play crucial roles in social freezing by offering individuals the option to preserve their fertility and reproductive options for non-medical reasons, allowing them to make informed decisions about family planning on their terms.
