## Growth Driver Of The Opioid-Induced Constipation Treatment Market

The rise in the administration of opioids for cancer and non-cancer pain is expected to propel the growth of the opioid-induced constipation treatment market going forward. Cancer pain

refers to pain associated with cancer and its treatment, while non-cancer pain refers to pain from conditions unrelated to cancer. Administration of opioids for cancer and non-cancer pain is driven by the need to effectively manage moderate to severe pain, considering factors such as the intensity and duration of pain, patient response to other treatments, and the overall goal of improving quality of life while minimizing potential risks of addiction and side effects. Opioid-induced constipation (OIC) treatment helps patients with cancer and non-cancer pain by relieving constipation caused by opioid use, thereby improving overall comfort, adherence to pain management regimens, and quality of life without compromising pain relief.

### Major Players And Market Trends

Key players in the opioid-induced constipation treatment market include Pfizer Inc., Merck & Co. Inc., Bayer AG, Sanofi S.A., AstraZeneca plc, Takeda Pharmaceutical Company Limited, Daiichi Sankyo Chemical Pharma Co. Ltd.

Major companies operating in the opioid-induced constipation treatment market are developing mu-opioid receptor antagonists to address the specific needs of patients suffering from opioid-induced constipation (OIC). Mu-opioid receptor antagonists offer a targeted approach to managing opioid-induced constipation, helping patients maintain bowel regularity while undergoing opioid therapy for pain management.

### Segments:

- 1) By Drug Class: Laxatives, Peripherally Acting  $\mu$ -opioid Receptor Antagonists, Serotonin Receptor Agonists, Prostaglandin
- 2) By Type: Oral, Parenteral
- 3) By Distribution Channel: Hospital Pharmacies, Online Pharmacies, Retail Pharmacies

### Geographical Insights: North America Leading The Market

North America was the largest region in the opioid-induced constipation treatment market in 2023. Asia-Pacific is expected to be the fastest-growing region in the forecast period. The regions covered in the opioid-induced constipation treatment market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

### Opioid-Induced Constipation Treatment Market Definition

Opioid-induced constipation (OIC) treatment refers to the various approaches and medications used to manage constipation caused by the use of opioid medications. These treatments aim to alleviate the symptoms of constipation without compromising the pain-relieving effects of opioids, thereby improving the patient's overall quality of life and maintaining effective pain management with both pharmacological with non-pharmacological approaches.

[Opioid-Induced Constipation Treatment Global Market Report 2024](#) from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Opioid-Induced Constipation Treatment Global Market Report 2024 by The Business Research Company is the most comprehensive report that provides insights on opioid-induced constipation treatment market size, opioid-induced constipation treatment market drivers and trends, opioid-induced constipation treatment market major players, opioid-induced constipation treatment competitors' revenues, opioid-induced constipation treatment market positioning, and opioid-induced constipation treatment market growth across geographies. The opioid-induced constipation treatment market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
