

# Alpha Glucosidase Inhibitors Market Size, Share And Growth Analysis For 2024-2033

*The Business Research Company's Alpha Glucosidase Inhibitors Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033*

LONDON, GREATER LONDON, UK,  
August 6, 2024 /EINPresswire.com/ --

The alpha glucosidase inhibitors market has experienced significant growth in recent years, expanding from \$4.22 billion in 2023 to an expected

\$4.58 billion in 2024 at a compound annual growth rate (CAGR) of 8.5%. This growth has been driven by increased diabetes incidence, heightened awareness of diabetes management, advancements in treatment strategies, and a preference for oral antidiabetic medications. As the market continues to grow, it is forecasted to reach \$6.11 billion by 2028, with a CAGR of 7.5%,

due to the emphasis on early intervention, a rising geriatric population, global healthcare initiatives for diabetes control, and integration into combination therapies.

## Aging Population Driving Market Growth

The growing aging population is a key driver for the alpha glucosidase inhibitors market. As this demographic trend continues, the need for effective diabetes management

becomes more critical. Alpha glucosidase inhibitors help manage blood glucose levels by delaying carbohydrate absorption, a crucial function for older individuals. According to the World Health Organization (WHO), the global population of people aged 60 and older is expected to double by 2050, reaching 2.1 billion, further driving market growth.
