

Anker SOLIX Unveils New Lineup of Compact and Mighty Portable Power Stations

Anker SOLIX today announced its latest lineup of super compact yet powerful portable power stations with the Anker SOLIX C300 DC and Anker SOLIX C300

BELLEVUE, WASHINGTON, US, August 14, 2024 /EINPresswire.com/ -- Anker SOLIX, a global leader in power delivery and power storage solutions, today announced its latest lineup of super compact yet powerful portable power stations. The new models, the Anker SOLIX C300 DC and Anker SOLIX C300, were engineered to provide the ultimate flexible power access for both outdoor adventures and home backup scenarios.

Anker SOLIX C300 DC portable power station: Ultra-Portable and Versatile Power

With its compact form factor, the Anker SOLIX C300 DC redefines portable power and is 30% smaller than the industry average, weighing just 6.18 lbs. Thanks to its vertical design as well as its built-in handle and optional shoulder strap accessory, the C300 DC, is the ideal power companion for hiking, cycling, and camping trips.

However, apartment dwellers and home owners can also rest easy during power outages as the C300 DC can be used to keep essential devices powered, including phones, tablets, USB-C powered laptops and other devices that utilize either USB or a standard DC auxiliary charging port.

Despite its compact size, the Anker SOLIX C300 DC boasts up to 300W output, features a 288Wh Lithium Iron Phosphate (LiFePO4) battery (90,000 mAh), and offers seven outlets, including two USB-A ports, four USB-C ports (two with 140W Input/Output), and one 120W auxiliary power

outlet.

This ensures that essential devices stay powered on the go or during outdoor activities. The C300 DC is also an excellent home power backup system, providing high-quality electricity during temporary power outages and easing related anxiety.

With three recharging modes, including dual 140W USB-C charging, users can recharge the C300 DC to 100% within 70 minutes, eliminating the need to own multiple chargers and substantially reducing the amount of e-waste created by older chargers. Additionally, it supports 100W solar panels and can be charged with the auxiliary power outlet, ensuring power availability anytime, anywhere.

The Anker SOLIX C300 DC also features a unique pop-up light that offers different levels of soft white light output, making it ideal for multiple situations, including camping, evening beach days or as the perfect backyard companion.

Anker SOLIX C300 Portable Power Station: Compact Power Station for Home & On-The-Go

For those users that like the form-factor of the C300 DC but need the convenience of an AC outlet, the Anker SOLIX C300 also emerges as a game-changer in portable energy solutions. The C300 offers up to 600W of power output via SurgePad, features a 288Wh LiFePO4 battery and is equipped with eight outlets, including three USB-C ports (two with 140W high-output), one USB-A port, three standard AC outlets as well as a single 120W DC auxiliary power outlet, ensuring that users have all the connectivity they need.

Anker SOLIX C300 DC, Compact but Mighty

Anker SOLIX C300 Portable Power Station

However, when the internal battery is drained, the C300 offers four efficient recharging modes, including a standard wall outlet that can fully charge the unit within 70 minutes, solar panels that achieve full charge in just three hours, auxiliary power outlet, and a USB-C PD port.

The C300 is 15% smaller than the industry average and with its vertical design, it is easy to carry around. For added convenience, an optional portable carrying strap is available for the C300 series, making it the ideal accessory for camping, hikes through rugged terrain and even taking it on a bike ride to give a little extra juice to an e-bike. Additionally, it makes for a great road trip accessory for kids in the back seat, trying to keep their phones, tablets and portable gaming consoles charged and powered up. This versatility makes the C300 an ideal companion for an active and on-the-go lifestyle.

The Anker SOLIX C300 is the ultimate portable power solution, combining convenience, power, and versatility in one sleek package.

Additionally, when the power goes out at home, the C300 can be used to ensure continuous access to essential small appliances such as Wi-Fi routers, CPAP machines, and lights, as well as phones, laptops, and more.

Specs

Anker SOLIX C300 DC

Battery type: LFP

Capacity: 288Wh

TTL output: 300W

AC Output: /

AC output Surge: /

AC port amount: /

USB-A: 2* USB-A 1* USB-C

total 24W

USB-C: 2* 140W USB-C(two-way) and 1* 100W USB-C (output)

Auxiliary charging port : 1*120W

AC re-charging: /

USB-C re-charging: 2*140W(total 280W)

Solar panel re-charging: 100W(32V)

Weight: 6.18lbs

Anker SOLIX C300

Battery type:LFP

Capacity: 288Wh

TTL output: 380W

AC Output: 300W

AC output Surge: 600W
AC port amount: 3* 110V
USB-A: 1* USB-A 1* USB-C
total 24W
USB-C: 1* 140W USB-C(two-way) and 1* 140W USB-C (output)
Auxiliary charging port: 1*120W
AC re-charging: 280W
AC/Adapter charging time: 70 mins to 100%
USB-C re-charging: 1*140W
Solar panel re-charging: 100W(32V)
Weight: 9 lbs

Price and availability:

Both the Anker SOLIX C300 DC and Anker SOLIX C300 are currently slated to be available on [anker.com](https://www.anker.com) and Amazon for \$199.99 and \$249.99 respectively beginning August 28th.
