## Geriatric Population Surge Fuels Growth in Nurse Call System Market

The surge in the geriatric population is a crucial driver for the nurse call system market. Elderly individuals are more prone to diseases such as osteoarthritis, chronic obstructive pulmonary disease, and diabetes mellitus due to their slowly developing immune systems. The increasing

global elderly population is driving the demand for efficient nursing care services that ensure rapid response and customized communication. For example, the United Nations Department of Economic and Social Affairs reported that in 2020, approximately 727 million people worldwide were aged 65 and above, a number expected to reach 1.5 billion by 2050. This demographic shift is significantly boosting the demand for nurse call systems.
