

Cold Chain Science Enterprises Announces Innovative Development in Last-Mile Delivery With the MEDI°COLD BOX

The patent-pending MEDI°COLD BOX is a handheld temperature-controlled packaging solution designed for same-day deliveries.

MONTREAL, QUEBEC, CANADA, September 4, 2024 /EINPresswire.com/ -- Cold Chain Science Enterprises (CCSE), developer of advanced cold chain solutions, is announcing the MEDI°COLD BOX, an innovative development in temperature-sensitive last-mile delivery technology. A handheld temperature-controlled packaging solution for same-day deliveries, the patent-pending device is designed specifically for use by hospitals, clinics and specialty pharmacies.

Temperature control is crucial in the manufacturing, distribution and storage of perishable and thermosensitive pharmaceutical products. While large-scale businesses successfully use cold chain technology to significant effect, organizations operating on a smaller-scale or immediate-need basis can find it more difficult to apply cold chain solutions.

The MEDI°COLD BOX solves the practical challenge of last-mile cold chain delivery. Utilizing a patent-pending delivery device alongside PCM (phase change material) blankets, it ensures

The patent-pending MEDI°COLD BOX is specifically designed for same-day thermosensitive deliveries to hospitals, clinics and specialty pharmacies.

CCSE develops innovative integrated solutions for temperature-controlled supply chains in the pharmaceutical, food and beverage, and logistics industries.

temperature stability for same-day deliveries of thermosensitive materials.

The MEDI°COLD BOX is simple to assemble, easy to carry, reusable and versatile. Its transportation applications include pharmaceuticals, blood products, specimens and samples, vaccines and other biologics.

“The MEDI°COLD BOX is a strong showcase of CCSE’s commitment to creating cold chain technology that satisfies the needs of organizations and businesses relying on same-day and last-mile deliveries ,” says Jean-Philippe Bédard, Founder & CCSO of CCSE. “It is also a prime example of what’s possible when you partner with a business, like SupplyOne Canada, that knows their industry inside and out.”

Designed to take advantage of cutting-edge packaging technology, the MEDI°COLD BOX was developed by experts from both CCSE and SupplyOne Canada, a leading provider of innovative custom packaging solutions in North America. The company is also the exclusive supplier of the MEDI°COLD BOX.

“SupplyOne Canada works to continually innovate in both the packaging and supply chain industries,” says Ken Wong, President of SupplyOne Canada. “The creation of the MEDI°COLD BOX is yet another successful venture with CCSE, showcasing the importance of packaging technology and highlighting just how strong and fruitful our partnership continues to be.”
