

AppGuard Solo: The Lesser-Known Cybersecurity Solution That Keeps Ransomware Away from Windows Computers

AppGuard Solo is a proactive ransomware protection for PCs. It blocks unallowed processes with a zero-trust model, ensuring security with minimal system impact.

LOS ANGELES, CA, UNITED STATES, October 7, 2024 /EINPresswire.com/ --

In a world where ransomware attacks are becoming more sophisticated and widespread, AppGuard emerges as a powerful yet under-the-radar cybersecurity solution offering unparalleled Windows computer protection. Unlike traditional antivirus programs that rely on signature updates and reactive measures, AppGuard takes a proactive approach, ensuring that ransomware and other malware are blocked before they can execute.

“

We are proud to be at the forefront of cybersecurity, providing a solution that protects against current threats and anticipates future ones.”

Dr. Fatih Comlekoglu, CEO of AppGuard

AppGuard's Innovative Technology: A Zero-Trust Execution Model

AppGuard employs a zero-trust execution model that blocks unauthorized processes, preventing ransomware and other malicious software from running on your system. This cutting-edge technology stops known threats and safeguards against new and emerging ones that traditional antivirus solutions might miss. This app ensures that users can operate in a secure environment, free from the constant worry of emerging malware. AppGuard's approach differs from anything else in the market; by

focusing on preventing malware execution rather than detecting it after the fact, we offer a higher level of security with minimal impact on system performance.

AppGuard Stops and Prevents Zero-Day Malware from Executing
Compare AppGuard's Application Control Software to Popular Antivirus Software

		Defeats Application Exploit	Defeats Non-Malware (utilities not disabled)	Defeats In-memory (all methods)	Defeats Social Engineering (privileged user action)	Defeats Insider Threat (i.e., block)	Defeat Ransomware (unfamiliar)
AppGuard		YES	YES	YES	YES	YES	YES
Cylance		NO	NO	NO	NO	NO	NO
Carbon Black		NO	NO	NO	NO	NO	NO
Symantec		NO	NO	NO	NO	NO	NO
McAfee		NO	NO	NO	NO	NO	NO
Trend Micro		NO	NO	NO	NO	NO	NO
Palo Alto Traps		NO	NO	NO	NO	NO	NO

* This matrix shows **real-time malware blocking**. AppGuard versus detect & react alternatives, which often only detect after the compromise. AppGuard blocks within microseconds of an attack beginning.

Compare AppGuard Effectiveness with popular antivirus products

Why Choose AppGuard?

AppGuard stands out for its ability to provide robust protection without disrupting the user experience. It operates seamlessly in the background, allowing users to continue their work without interruptions or the need for constant updates. Compatible with existing antivirus programs, AppGuard adds an essential layer of defense that complements other security measures.

Protecting What Matters Most

AppGuard is ideal for many users, from individual consumers to small and large enterprises. Whether protecting sensitive data or ensuring business continuity, AppGuard offers a simple yet effective solution to the ever-present ransomware threat.

Ransomware attacks can be devastating, especially for small businesses that may not have the resources to recover; AppGuard is a game-changer for those who need top-tier protection without the complexity and overhead of other security solutions.

AppGuard Enterprise provides centrally managed Zero-Day-Trust endpoint protection solutions for corporate and middle-size businesses. [AppGuard Solo](#), a self-managed, standalone version for small businesses and home computers, offers a unique opportunity for the retail consumer to implement corporate-level cybersecurity protection for a no-brainer yearly subscription price of \$89.99 (One License covers three PCs)
