Growth Driver Of The Neonatal Infant Care Market

The rise in infant mortalities is expected to propel the growth of the neonatal infant care market going forward. Infant mortality refers to the death of infants who are under the age of one year, and it is an important public health statistic that reflects the overall health and well-being of a population. Neonatal infant care is used to prevent infant mortalities with neonatal intensive

care units (NICUs), as they provide specialized care and support for premature infants, helping them survive and thrive.
