Growth Driver Of The Aprotic Solvents Market

The growing demand for electronic products is expected to propel the growth of the aprotic solvents market going forward. Electronic products include a wide range of devices that rely on electronic components and technology for their functionality. Aprotic solvents are used in electronic products to clean soldering flux residues and other contaminants from the surface of the printed circuit boards (PCBs) used in electronic devices. They are also used in the cleaning and preparation of silicon wafers before various process steps, such as thin-film deposition or etching, in preparing metal surfaces for electroplating processes, to dissolve adhesives, coatings, and encapsulants in electronic components and devices.
