ITILITI HEALTH

By harnessing Itiliti Health's best-in-class technology, the health plan has successfully automated prior authorizations, resulting in a substantial reduction in administrative workload and operational costs— and eliminating care delays for members of the health plan. Furthermore, in January 2024, Itiliti Health and EPIC to pioneer [prior authorization automation](#) within the EHR platform.

“Our mission is to empower payers and providers with automated tools designed to enhance efficiency and minimize the costs related to prior authorizations,” stated Michael Lunzer, CEO of Itiliti Health. “We have created a future where advanced technology simplifies the prior authorization process and seamlessly integrates with the solutions already utilized by providers. This not only fosters greater efficiency and cost savings but also enables providers to concentrate on delivering high-quality care to their patients.”

Itiliti Health's suite of products is built on a flexible, open-API framework, delivering comprehensive solutions specifically designed for the healthcare industry. This modular, plug-and-play approach not only enhances usability and offers a phased approach to implementation, but also offers significant cost savings while ensuring compliance with state and federal regulations.

Itiliti Health is dedicated to ongoing innovation and delivering solutions that enhance the efficiency and value of communication between payers and providers. This accomplishment reflects the company's unwavering commitment to excellence and its mission to revolutionize

the prior authorization process.

About Itiliti Health

Through our innovative solutions, Itiliti Health is at the forefront of transforming the prior authorization landscape. By eliminating unnecessary manual processes, implementing automation, and streamlining operations, we significantly reduce administrative burdens and operational and clinical costs. Our approach not only enhances efficiency and creates significant cost savings for payers but also improves the satisfaction of healthcare providers and patients alike, making the entire healthcare delivery system more effective and responsive.
