Catheters Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

The catheters market has seen significant growth in recent years, rising from \$29.97 billion in 2023 to an estimated \$32.5 billion in 2024, with a compound annual growth rate (CAGR) of 8.4%.

“

The catheters market size is expected to see strong growth in the next few years. It will grow to \$46.81 billion in 2028 at a compound annual growth rate (CAGR) of 9.6%.”

*The Business Research
Company*

This growth during the historical period is attributed to the increasing aging population, the prevalence of chronic diseases, a shift toward minimally invasive surgical procedures, heightened awareness and treatment of urinary incontinence, and the expansion of healthcare infrastructure.

What Is the Anticipated Growth Rate and Market Size of the [Global Catheters Market?](#)

The catheters market size is projected to experience significant growth in the coming years, reaching \$46.81 billion by 2028 at a compound annual growth rate (CAGR)

of 9.6%. This growth during the forecast period is driven by the rising use of telemedicine and remote patient monitoring, an emphasis on personalized medicine, the application of regenerative medicine techniques, a growing shift toward patient-centric care, and an increasing focus on sustainable and eco-friendly catheter materials. Key trends expected in this period include the integration of artificial intelligence (AI) and robotics in catheter-based procedures, the development of advanced infection control technologies, technological innovations, product

advancements, and the adoption of IoT.

What Is The Primary Growth Driver Of The Catheters Market?

The increasing incidence of cardiovascular disorders is anticipated to drive the growth of the catheters market in the future. Cardiac catheterization involves the insertion of a catheter through a blood vessel to the heart for improved diagnosis of health conditions. The rise in cardiovascular disease prevalence, along with the growing demand for cardiovascular treatments, is expected to boost the need for catheters.
