What Are The [Major Factors Driving The Growth Of The Skin Cancer Drugs Market?](#)

The rising levels of sun exposure and tanning among individuals are expected to drive growth in the skin cancer drug market in the coming years. Sun exposure refers to the amount of time a person spends in sunlight, which can have both positive and negative effects on skin and overall health. Tanning occurs when the skin darkens or discolors due to prolonged exposure to sunlight or other sources of ultraviolet (UV) radiation. The incidence of skin diseases, particularly skin cancer, combined with advancements in treatment options and growing awareness, contributes to the growth of the skin cancer drug market.
