

# The Solar Revolution Powers Boulder's Sustainable Future with Renewable Energy Solutions

BOULDER, CO, UNITED STATES,  
November 26, 2024 /

EINPresswire.com/ -- [The Solar Revolution](#) (TSR), a woman-owned, veteran-owned small business founded by Matt and Sarah Napier, is proud to announce its ongoing efforts to help Boulder County embrace a more sustainable future. Since 2010, TSR has specialized in delivering high-quality solar installations for both residential and commercial clients, making clean energy more accessible to the community.

For the entire team at The Solar Revolution, solar energy is more than a business - it's a mission to create a cleaner, brighter future for Boulder and beyond.

"Our mission has always been about more than just solar installations," said Matt Napier, co-owner of TSR. "It's about empowering families and businesses to take control of their energy use and contribute to a more sustainable world."

TSR's expertise extends beyond traditional solar panel systems to include the installation of EV chargers, Tesla Powerwalls, and comprehensive electrical contracting services. Notable projects include the energy-efficient [Calcaire House](#), the Boulder [Jewish Community Center](#), and a significant role in Denver's Community Solar Gardens initiative. TSR also actively supports organizations like the Denver Office of Climate Action, Sustainability & Resiliency (CASR) and the Colorado Clean Energy Fund, furthering their commitment to sustainability.

"Helping the community become more sustainable is at the heart of everything we do," said Sarah Napier, co-owner of TSR. "We're dedicated to providing solutions that are not only environmentally responsible but also reliable and efficient for our customers."

As a NABCEP-certified and Tesla Energy-certified company, TSR ensures top-tier service from initial consultation to installation completion. With current federal and local incentives, there has never been a better time to transition to renewable energy.

“There’s never been a better time to go solar,” added Matt Napier. “With the financial incentives available today, homeowners and businesses can make a significant environmental impact while saving on their energy costs.”
