#### Report Overview and Scope:

□ The Ambulatory Surgery Center (ASC) market is on a remarkable trajectory, projected to grow from USD 115.2 billion in 2022 to USD 190.6 billion by 2030, with a robust CAGR of 6.5%. This growth reflects not only the increasing number of ASCs but also a significant shift in surgical procedures from traditional hospital settings to more efficient and cost-effective outpatient facilities. As advancements in minimally invasive surgeries, endoscopy, and laparoscopy continue to evolve, we can expect this trend to gain even more momentum.

□ The financial implications of this shift are profound. With rising hospital stay costs prompting a demand for ambulatory services, ASCs have emerged as a viable solution, demonstrating their ability to reduce annual healthcare costs in the U.S. by an impressive USD 38 billion, according to the Ambulatory Surgery Center Association. This not only highlights the economic benefits but also underscores the role of ASCs in enhancing healthcare accessibility and affordability for patients.

□ As major players in the healthcare sector pursue strategic initiatives such as acquisitions to broaden their reach and service offerings, the landscape of outpatient care is undergoing a significant transformation. Recent acquisitions, like that of Lippy Surgery Center and Executive Ambulatory Surgery Center by SurgNet Health Partners, Inc., exemplify this trend. As we move forward, it is essential for industry stakeholders to stay informed and adapt to these changes, ensuring that we continue to provide high-quality, patient-centered care in this evolving market.
