Hydrazine Market growth is driven by increase in need for agrochemicals and rise in demand for high-quality agricultural products. However, presence of extreme toxicity in hydrazine that can cause seizures & tumors and various environmental and industry regulations imposed by the National Institute for Occupational Safety and Health restrain the market to some extent. On the other hand, rise in demand for polymer foams from the polymer industry presents new opportunities in the upcoming years.

“

Hydrazine Market growth is driven by increase in need for agrochemicals and rise in demand for high-quality agricultural products.”

Allied Market Research (AMR)

Based on application, the blowing agent segment held the largest market share in 2020, holding nearly one-third of the total market share, and is expected to continue its leadership status during the forecast period.
