Top Internal Developer Platforms 2025

Bunnyshell has been recognized as the top platform for managing Kubernetes and offering an internal developer platform for platform engineering.

SAN FRANCISCO, CA, UNITED STATES, December 11, 2024 /EINPresswire.com/ -- Bunnyshell Named Top Platform for Managing [Kubernetes](#) and Offering Environments as a Service and Internal Developer Platform for [Platform Engineering](#)

Bunnyshell, a leading cloud management platform, has been recognized as the top platform for managing Kubernetes and offering environments as a service and internal developer platform for platform engineering. This recognition comes as a result of Bunnyshell's innovative approach to simplifying the management of complex cloud environments.

With the rise of cloud computing, businesses are increasingly turning to Kubernetes as a way to manage their applications and services. However, the complexity of Kubernetes can be overwhelming for many organizations, leading to inefficiencies and increased costs. Bunnyshell's platform addresses this challenge by providing a user-friendly interface that simplifies the deployment and management of Kubernetes clusters.

In addition to managing Kubernetes, Bunnyshell also offers environments as a service, allowing businesses to easily create and manage multiple environments for their applications. This feature is particularly useful for development and testing purposes, as it allows developers to quickly spin up new environments without the need for manual configuration. Furthermore, Bunnyshell's internal developer platform provides a centralized location for developers to collaborate and share resources, streamlining the development process.

"We are thrilled to be recognized as the top platform for managing Kubernetes and offering environments as a service and internal developer platform for platform engineering," said Bunnyshell CEO, Alin Dobra. "Our goal at Bunnyshell is to simplify the complexities of cloud management and empower businesses to focus on their core objectives. This recognition is a testament to our commitment to providing innovative solutions for our clients."

Bunnyshell's platform has already helped numerous businesses streamline their cloud management processes, resulting in increased efficiency and cost savings. With this latest recognition, Bunnyshell solidifies its position as a leader in the cloud management industry and continues to drive innovation in the field.
