Global Airway Management Devices Market 2023-2028: Growth of 7.6% CAGR

TOKYO, JAPAN, December 13, 2024  
/EINPresswire.com/ --

The global airway management devices market is projected to reach a value of \$40.3 billion by 2028, growing at a CAGR of 7.6% from 2023 to 2028. This growth is driven by the increasing prevalence of respiratory diseases, the aging population, and the rising demand for minimally invasive surgical procedures. The market is segmented into various types of devices, including endotracheal tubes, laryngeal mask airways (LMAs), and video laryngoscopes. The Asia-Pacific region is expected to be a significant growth driver due to its large population and increasing healthcare expenditure.

Airway Management Devices Market

The market is segmented into various types of devices, including endotracheal tubes, laryngeal mask airways (LMAs), and video laryngoscopes. The Asia-Pacific region is expected to be a significant growth driver due to its large population and increasing healthcare expenditure.
