“We’ve made the impossible possible,” says Florin Muresan, CEO of AISQ. “For the first time in history, small business owners can automate their entire digital marketing process—content creation, publishing, SEO, social media, and email—all while spending less than 30 minutes a week on approvals. Our AI system runs everything, allowing business owners to focus on what

they do best.”

The Journey: From Alpha to Early Access

Alpha Version 1: Tested from Q3 2023 to Q2 2024, focusing on stability and performance.

Alpha Version 2: Launched on August 15, 2024, refining the system based on user feedback.

Closed Beta: Ran from October 2 to November 20, 2024, integrated into [AISQbusiness](#), and received critical acclaim for its real-world applications. Early Access: Launched on November 22, 2024, with public availability and limited-time Early Bird pricing of just \$9.99 USD (paid once to get started). Prices will increase after the Early Access phase concludes in December 2024.

### A New Era of Marketing: Proof in Action

Back in the Alpha version 2 release, Next Level Marketing AI had already enabled 200 small business owners to experience end-to-end marketing automation for the first time in human history. These users have successfully:

Published fully optimized content to websites, search engines, and social media profiles.

Sent email campaigns created by the system's AI Specialists.

Spent just minutes a day approving text and making minor edits, while the AI performed all tasks autonomously.

With the Early Access that was launched in 22nd Nov 2024, the platform is more stable and improved from all the feedback and over a thousand units have been purchased by business owners all over the world.

In a recent demonstration, AISQ's CEO showcased how he completed a week's worth of digital marketing for one website in just 15 minutes. This milestone is documented in a widely-viewed YouTube video, further proving the platform's groundbreaking capabilities.

### Next-Level Features: Built for Ease and Efficiency

Unlike conventional AI content tools, Next Level Marketing AI offers a complete marketing workflow, featuring AI Specialists that mirror the expertise of a full marketing team:

Research AI Specialist: Performs advanced keyword research, analyzing top competitors.

Early users describe the experience as being akin to working with a human marketing agency, spending their time on approvals while the system handles the execution.
