The image shows the cover of a report titled "MEDICAL COURIER MARKET". The cover features a photograph of a person in a white lab coat handing a white box labeled "PHARMACY" to another person wearing white gloves. The report title "MEDICAL COURIER MARKET" is prominently displayed in orange and black text. Below the title, it states "OPPORTUNITIES AND FORECAST, 2023-2032". A key finding is highlighted: "Medical courier market is expected to reach **\$16.2 BILLION** by 2032". Another key finding is: "Growing at a **CAGR OF 6.1%** (2023-2032)". The Allied Market Research logo is in the top left corner, and the report code "A313234" and website "www.alliedmarketresearch.com" are at the bottom.

Medical Courier Industry Size

Increase in prevalence of chronic diseases such as cancer and diabetes, surge in ageing population and increased adoption of biopharmaceuticals globally are expected to drive the growth of the [medical courier market](#). Moreover, rise in strategic cooperation among biopharmaceutical companies is expected to complement the growth of the biopharmaceutical industry. The surge in demand for temperature monitoring across healthcare and pharmaceuticals sectors is expected to drive the need for advanced storage solutions, which further accelerates the growth of the market.

The global population is undergoing a significant aging trend, leading to a surge in the prevalence of cardiovascular diseases and other health issues. According to the World Health Organization (WHO), the proportion of people aged 60 and above is expected to double from 12% to 22% between 2015 and 2050. This demographic shift is particularly pronounced in low- and middle-income countries, where up to 80% of the elderly population resides.

The rise in age-related ailments has resulted in a growing demand for medications, medical equipment, organs, and various other healthcare necessities. To address these needs, the use of medical courier practices has become increasingly proactive. Non-governmental organizations (NGOs) have played a crucial role in meeting the demands for medicines, especially in regions with a high concentration of elderly individuals.

Moreover, there has been a notable development in the medical supply chain, allowing certain suppliers to transport confidential patient notes and reports. This advancement facilitates the seamless exchange of medical information across state and national borders, catering to both interstate and intracountry healthcare requirements. The escalating prevalence of cardiovascular diseases underscores the importance of efficient and confidential medical courier services to meet the evolving healthcare needs of the aging global population.

On the basis of product type, the medical suppliers and equipment segment held the highest market share in 2022, and the highest CAGR of 6.7% is estimated to maintain its leadership status throughout the forecast period. This is attributed to surge in hospitals, clinics, ambulatory centers, urgent care centers where there is demand for medical devices and equipment such as MRI machines, lasers, lab equipment, and others. However, the lab specimens segment is projected to grow with a CAGR of 7.0% from 2023 to 2032, due to increase in prevalence of chronic diseases such as cancer and diabetes, surge in ageing population, and increased adoption of biopharmaceuticals globally.

On the basis of service type, the domestic segment held the highest market share in 2022 witnessing a CAGR of 6.9% in the forecast period, due to easy availability, convenient shopping experiences, and heavy discounts, offers, and deals which have made the e-commerce a popular medium for purchasing various medical products domestically. However, the international segment is projected to witness the highest CAGR of 6.9% from 2023 to 2032, owing to the rising cross-border trade activities.

On the basis of region, Asia-Pacific held the highest market share in terms of revenue in 2022 and is estimated to witness a CAGR of 5.6% due to the high growth of e-commerce coupled with the rise in the pharma trade sector in [Asia-Pacific drives the demand for medical courier in the region](#). However, the LAMEA region is expected to witness the fastest CAGR of 7.0% from 2023 to 2032, owing to the emergence of last-mile deliveries coupled with logistics automation.
