The key players profiled in this report include the key companies profiled in the report include Nestle S.A., Kraft Foods Group Inc., General Mills Inc., Kellogs, Conagra Brands Inc., PepsiCo, The Coca-Cola Company, Del Monte Foods Inc., CHB, and Princes Limited.

Over the past four decades, the consumption rate of food products that requires minimal time for preparation has been on the rise especially in economically developed countries. Government of economically developing or under developed regions have been taking active steps on providing basic necessities to the part of population thriving in regions enduring various uncertain climatic conditions. This has resulted in demand for various emergency food products from the governments end which could cater to the rising needs and requirements of the people living in such regions. Several macro-economic factors have influenced the market of such emergency food products such increase in workforce participation rate, decline in prices for various convenience food products, and rise in per capita income of consumers, especially in North America, Europe, and Asia-Pacific which has eventually driven the emergency food

industry by values sales.

Emergency food products play a crucial role in the defense sector. Army personnel are posted in war zones, where there is low access to food and water. In such situations, army personnel are forced to carry food and beverages on emergency basis. Thus, emergency food products such as dried fruits and ready-to-eat meals cater to their requirements. As a result, army sector is considered as the prime customer of the emergency food market forecast.

The emergency food product provides a wide range of product portfolio which caters to the varying needs and requirements of target customers. However, the penetrations of such products are low especially in economically undeveloped countries. In African nations, region experience uncertain climatic conditions due to which there is higher need for emergency food product. However, the distribution channel in these regions are low.

According to the World Health Organization (WHO), there are approximately 10 million nongovernmental organizations (NGO) around the world. Helping, supporting, and providing basic amenities (food and clothing) to the poor and needy is one of their key roles. Some of the major NGOs have strategized on merging with emergency food suppliers to cater to the needs of these people. Availability of preprocessed food is anticipated to reduce cooking time and provide better & quick service to these consumers. Thus, collaboration with NGOs is anticipated to boost the demand for ready meals, thereby supplementing the emergency food market growth.
