Prime determinants of growth

The growth of the Europe and Middle East [shooting ranges market](#) is driven by factors such as rise in territorial conflicts in Europe and the Middle East, increase in defense expenditure, and surge in demand for guns for competitive sports. However, high costs associated with simulation and training services and products, and increase in environmental issues hamper the growth of the market. On the contrary, increase in contracts and agreements with military forces and increase in defense modernization are expected to offer remunerative opportunities for the expansion of the Europe and Middle East shooting ranges market during the forecast period.

Impact of Russia-Ukraine War Scenario on Shooting Ranges Industry in Europe and Middle East Region:

The Russia-Ukraine War has had a significant impact on the Europe and Middle East shooting

ranges market. The war in Ukraine has led to a surge in interest in firearms training and shooting lessons in Poland and other European countries. Many people, who had never used firearms before, have been enrolling in shooting courses to acquire self-defense skills in response to the conflict. This rise in demand for shooting lessons is attributed to concerns that the war's impact might extend beyond Ukraine's borders. Notably, both civilian shooting ranges and the Territorial Defence Forces, Poland's volunteer militia, have experienced a significant increase in interest and enrollment. This phenomenon reflects how geopolitical events can influence interest in self-defense training and firearm use in different regions.

Additionally, state-owned companies have initiated self-defense training programs for their employees. Several countries have seen a substantial increase in interest from potential recruits following the conflict in Ukraine, with an expansion plan to increase its personnel.

Report Coverage & Details:

Drivers Rise in territorial conflicts in Europe and the Middle East

Increase in defense expenditure

Surge in demand for guns for competitive sports

Opportunities Increase in contracts and agreements with military forces

Increase in defense modernization

Restraints High costs associated with simulation and training services and products

Increase in environmental issues

The indoor shooting range segment to maintain its leadership status throughout the forecast period.

Based on type, the indoor shooting range segment held the highest market share in 2022, accounting for more than half of the Europe and Middle East shooting ranges market revenue, and is estimated to maintain its leadership status throughout the forecast period, as indoor shooting ranges can be built or located in high-traffic areas as it is inside the building due to which the shooters and members do not get disturbed by outside noise and can give full concentration to shooting. Moreover, the outdoor shooting range segment is projected to manifest the highest CAGR of 10.2% from 2023 to 2032, owing to their advantages such as increased firing mobility for more tactical freedom, distance, and terrain-based exercises.

Leading Market Players: -

Action Target, Inc.
Cubic Corporation
InVeris Training Solutions
Polytronic International AG
Saab AB
Theissen Training Systems GmbH
EDGE Group PJSC
Faris Group
INTARSO GmbH
ELI OÜ

The report provides a detailed analysis of these key players of the Europe and Middle East shooting ranges market. These players have adopted various strategies such as acquisition, contract, product launch, and others to increase their market penetration and strengthen their position in the industry. The report is helpful in determining the business performance, operating segments, developments, and product portfolios of every market player.

The fixed targets segment to maintain its leadership status throughout the forecast period.

Based on the product type, the fixed targets segment held the highest market share in 2022, accounting for more than two-fifth of the Europe and Middle East shooting ranges market revenue, and is estimated to maintain its leadership status throughout the forecast period as there is an increase in recreational clubs in developed and developing regions propels the demand for the shooting ranges. However, the virtual simulators segment is projected to manifest the highest CAGR of 11.0% from 2023 to 2032, owing to militaries and civil forces inclining toward cost-effective virtual training solutions for effective troop deployment and reducing the logistical requirements along with cost-effectiveness of operations.

The military segment to maintain its lead position during the forecast period

Based on end-user, the military segment accounted for the largest share in 2022, accounting for more than three-fourth of the Europe and Middle East shooting ranges market revenue, and is estimated to maintain its leadership status throughout the forecast period as there is an increase in use of shooting ranges for small arms marksmanship instruction and live-fire exercises by military. Moreover, the segment is projected to manifest the highest CAGR of 9.9% from 2023 to 2032, owing to military and law enforcement agencies may use shooting ranges for firearms qualification, pattern recognition testing, and rapid deployment drills.
