

ODeX Empowers India's Maritime Industry with Digital Solutions for SCMTR Compliance

ODeX offers digital solutions to support SCMTR compliance, streamlining cargo documentation and enhancing efficiency as new regulations take effect across India

MUMBAI, MAHARASHTRA, INDIA, January 17, 2025 /EINPresswire.com/ --

The implementation of Sea Cargo Manifest and Transshipment Regulations (SCMTR) across India marks a transformative step in the

maritime industry, bringing in a new era of digital documentation. The regulations, confirmed by the Commissioner of Customs, now mandate all shipping lines and vessel operators to comply with new digital submission protocols for cargo operations at Indian ports.

“

With SCMTR's new digital requirements, we are committed to ensuring that stakeholders not only meet compliance but also unlock the operational efficiencies these advancements bring.”

Binai Thoppil, COO at ODeX

Under these newly enacted regulations, the submission of Sea Arrival Manifest (SAM) before vessel arrival and Sea Entry Inward (SEI) post-arrival has become mandatory, marking a significant advancement in India's maritime trade documentation processes. Industry stakeholders are now actively implementing digital solutions to meet these requirements, which are designed to enhance transparency and efficiency in cargo handling processes.

"This regulatory shift represents a crucial step in modernizing India's maritime sector," said Liji Nowal,

Founder and CEO of ODeX. "The industry's readiness to embrace digital transformation aligns with global trends toward more efficient, transparent trade operations."

The automation of manifest submissions and digital documentation represents a significant advancement in streamlining maritime operations, improving both processing times and accuracy. ODeX's SCMTR module supports this transition with essential functionalities including Cargo Sequence Number (CSN) generation, streamlined House Bill of Lading (HBL) requests, and

accurate manifest submissions. The solution is actively deployed across major ports including Tuticorin, Visakhapatnam, Ennore, Kattupalli, Cochin, Marmagoa, Kandla, Mumbai, and Mangalore, ensuring standardized digital documentation processes throughout India's key maritime gateways.

Binai Thoppil, COO at ODeX, emphasized the company's commitment to its partners: "Our goal at ODeX has always been to simplify complex processes for our partners in the maritime industry. With SCMTR's new digital requirements, we are committed to ensuring that stakeholders not only meet compliance but also unlock the operational efficiencies these advancements bring."

Key steps in the SCMTR transition include:

- [Digital submission of cargo manifests](#)
- Integration with customs systems
- Standardized documentation formats
- Enhanced data validation processes

Maritime stakeholders can access the official [SCMTR FAQs](#) on the Government of India website for compliance guidelines.
