Kynamro Market Report 2025 – Market Size, Trends,
And Global Forecast 2025-2034

Is the [Kynamro Market](#) Set to Witness Substantial Growth?

Following substantial growth trends in recent years, the Kynamro market size with a compound annual growth rate CAGR of XX% is set to grow from \$XX million in 2024 to \$XX million in 2025. This historic period growth can largely be linked to the increasing prevalence of familial hypercholesterolemia HoFH, a rise in global obesity rates, development of patient advocacy campaigns, an uplift in healthcare expenditure, and positive clinical trials.

Fast forwarding to the forecast period, the Kynamro market size is anticipated to see a CAGR of XX%, growing to \$XX million by 2029. This projected market growth is attributable to the rising prevalence of cardiovascular diseases, escalating diagnosis rates, the aging population, an upswing in the adoption of personalized medicine, and amplifying research and development activities. Also contributing to this growth are advances in RNA therapeutics, technological enhancements in genetic testing, a shift towards personalized medicine, technological innovative treatment options, and advancements in AI in drug discovery.

What Drives the [Kynamro Market Growth](#)?

The global rise in cardiovascular disease is a significant driver influencing the growth of the Kynamro market. Cardiovascular disease, encompassing conditions that impact the heart and blood vessels, frequently manifests in heart attacks, strokes, and hypertension. The rise in such health issues is linked to factors like unhealthy diets, lack of physical activity, smoking, excessive alcohol consumption, along with rising rates of obesity and diabetes. Kynamro, an innovative

treatment solution that works by inhibiting the production of a cholesterol-contributing protein, effectively controls cholesterol levels and lowers the prolonged risk of cardiovascular disease. For instance, the Australian Institute of Health and Welfare reported a spike in doctor-certified deaths due to CHD in 2022, which numbered 14,900 compared to 14,100 in 2021. Consequently, the escalating prevalence of cardiovascular disease is amplifying Kynamro market growth.
