

# South River Technologies Unveils Next-Generation Cloud-First Microservices Suite

*New cloud-first microservices empower businesses with security, compliance, and automation while seamlessly integrating with existing solutions.*

ANNAPOLIS, MD, UNITED STATES, January 29, 2025 /EINPresswire.com/ -- [South River](#)

“

Technology is evolving rapidly, and we're excited to deliver innovative solutions that meet market demands, keeping our customers secure, compliant, and ahead of the curve.”

*Michael Ryan, CEO of South River Technologies*

[Technologies](#), Inc. (SRT), a global leader in secure file access, sharing, and transfer solutions, today announced the launch of its latest innovation: a comprehensive suite of cloud-first, security-centric microservices. Designed to extend the feature set of existing on-premises solutions while seamlessly offloading critical functions to the cloud, these new microservices empower businesses with enhanced compliance, automation, and disaster recovery capabilities—all on a flexible subscription basis.

SRT's cutting-edge microservices suite has been engineered to deliver high-performance security services

with minimal impact on existing workflows. These new solutions are fully compatible with the extensive ecosystem of SRT's Titan SFTP, Managed File Transfer (MFT), and DMZ Server installations deployed globally.

"Our customers operate in increasingly diverse environments, from Linux and Windows to hybrid and fully cloud-based infrastructures," said John Glavin, Chief Technology Officer at SRT. "Traditional software upgrades often disrupt business operations. With our new microservices architecture, customers can integrate powerful new capabilities without downtime or infrastructure overhauls."

## Pioneering a Cloud-First Future

Built from the ground up for scalability and interoperability, SRT's microservices leverage cutting-edge technologies to streamline security and compliance efforts. By offloading critical functions to the cloud, businesses can ensure greater agility, efficiency, and resilience against evolving cybersecurity threats. Learn how your organization can benefit from these innovations by scheduling a consultation today. Visit [South River Technologies](#) to explore our full suite of

security solutions.

## Future-Ready Security & Compliance

SRT's new suite of microservices reinforces its commitment to "Relentless Innovation", delivering enterprise-grade security enhancements that help organizations meet evolving compliance mandates while mitigating risks. These cloud-first services integrate seamlessly into existing deployments, enabling businesses to scale security operations with ease. Discover how SRT's microservices can help your business stay ahead of compliance and security challenges — [contact our team for a customized solution.](#)

"Security and compliance are no longer optional—they are mission-critical," added Glavin. "By launching these cloud-first microservices, we're providing our customers with the tools they need to stay ahead of threats while maintaining operational efficiency."

## Expert Support & Seamless Implementation

To ensure a frictionless transition, SRT offers expert consulting services, assisting businesses in deploying and optimizing these microservices across various environments, whether in the cloud, as containers, or within on-premises architectures.
