What's Driving the Growth of the Portrazza Market?

A significant growth driver for the Portrazza market is the increasing incidence of lung cancer. Lung cancer is a type of cancer that initiates in the lungs, typically in the cells lining the air passages, and can proliferate to other parts of the body. Factors such as smoking, exposure to environmental pollutants, genetic predisposition, and occupational hazards like asbestos are propelling the incidence of lung cancer. Portrazza necitumumab is a targeted therapy that treats lung cancer by inhibiting the epidermal growth factor receptor EGFR, a key player in cancer progression. This mechanism helps slow down the progression of non-small cell lung cancer NSCLC when used with chemotherapy.
