

Tabifolk Talks Webinar Spotlights KultureCity's AI-Powered Sensory-Inclusive Innovations

Tabifolk Talks spotlights KultureCity's AI-driven sensory-inclusive innovations, from mobile sensory rooms to the groundbreaking Koji AI for communication.

MA, UNITED STATES, February 3, 2025 /EINPresswire.com/ -- The latest episode of the Tabifolk Talks webinar series, aired on January 29, 2025, featured an insightful conversation with KultureCity, a nonprofit dedicated to improving experiences for individuals with sensory needs and disabilities. The episode highlighted KultureCity's groundbreaking initiatives, including their sensory-inclusive bags, mobile sensory rooms at large-scale events, and their innovative KultureCity App.

Meg from KultureCity highlights new AI features in KultureCity app on Tabifolk Talks webinar

“

We were thrilled to feature KultureCity on Tabifolk Talks to showcase their life-changing work and dedication to making the world more inclusive for people with sensory needs using innovations like AI”

*Josh Grisdale, Founder of
tabifolk*

A key highlight of the episode was a discussion with KultureCity's in-house expert, Meg, about the KultureCity App, which provides users with information about sensory-inclusive certified locations near them. The app also features Koji – The World's First AI Talker & Conversation App, a revolutionary, free AAC (augmentative and alternative communication) tool designed to empower non-speaking individuals to communicate for travel, safety, and everyday interactions.

KultureCity's efforts have made a significant impact at major events like the Super Bowl and New Year's Eve in Times Square, ensuring that sensory-friendly experiences

are available to all. Their mobile sensory rooms and resources continue to set new standards for accessibility.

“We were thrilled to feature KultureCity on Tabifolk Talks and showcase their life-changing work in accessibility and inclusion,” said Josh Grisdale, Founder of tabifolk. “Their dedication to making the world more inclusive for people with sensory needs using innovations like AI is truly empowering.”
