

Application Gateway Market Set to Surpass \$4.24 Billion by 2030, Register at a CAGR of 9.5%

Rise in number of different application layer attacks and surge in demand for secure networks drive the growth of the global application gateway market.

WILMINGTON, NEW CASTLE, DE, UNITED STATES, February 4, 2025 /EINPresswire.com/ -- The [Global Application Gateway Market](#) report provides an in-depth analysis of the top investment pockets, top winning strategies, drivers & opportunities, market size & estimations, competitive scenario, and wavering market trends.

Rise in number of different application-layer attacks and surge in demand for secure networks drive the [growth of the global application gateway market](#). On the other hand, lack of mandatory regulations for information security impede the growth to some extent. However, an increase in the adoption of the Internet of things, AI, and software-defined network technologies are expected to create lucrative opportunities in the industry. The global application gateway market size was valued at \$1.75 billion in 2020, and is projected to reach \$4.24 billion by 2030, growing at a CAGR of 9.5% from 2021 to 2030.

For more information, contact Allied Market Research (1000 17th Street, Suite 1000 - 221, Wilmington, DE) at: <https://www.alliedmarketresearch.com/request-sample/A09563>

Based on component, the software segment accounted for the major share in 2020, holding nearly three-fifths of the global market. The service segment, however, would exhibit the fastest CAGR of 10.5% throughout the forecast period.

Global Market Research Report, 2020.

Depending on industry vertical, the IT & telecom sector holds the largest application gateway market share of the market as it is helping them with network and cyber security capabilities like safeguarding their applications from common vulnerabilities like SQL injection and cross-site scripting, effective management of cloud services, centralized SSL certificate management, and others. However, retail & e-commerce segment is expected to grow at the highest rate during the forecast period, owing to immediate shift in consumer preference toward digital shopping.

Based on region, the market across North America held the lion's share in 2020, garnering nearly two-fifths of the global market. The Asia-Pacific region, on the other hand, is expected to cite the fastest CAGR of 11.1% by the end of 2030. The other provinces studied in the report include Europe and LAMEA.

Based on enterprise size, the large enterprises segment generated the highest share in 2020, accounting for more than half the global [application gateway industry](#). The SMEs segment, on the other hand, would exhibit the fastest CAGR of 10.7% from 2021 to 2030.

An application gateway, often known as an application level gateway (ALG), is a network security firewall proxy. It filters incoming node traffic according to predefined criteria, ensuring that only network application data is screened. File Transfer Protocol (FTP), Telnet, Real Time Streaming Protocol (RTSP), and BitTorrent are examples of network applications. Furthermore, an

application gateway allows for secure network system connectivity at a high level. When a client seeks access to server resources such as files, Web pages, or databases, for example, the client first connects to the proxy server, which then connects to the primary server.

□□□□□□□□ □□□□□□□□:

Region wise, the application gateway market was dominated by North America in 2020 and is expected to retain its position during the forecast period, owing to increase in number of data breaches and cyber-attacks. However, Asia-Pacific is expected to witness significant growth during the forecast period, owing to increase in adoption of work from home policy by majority of the companies.
