

# Chemotherapy-Induced Pain Market Set to Grow Substantially Through 2032, DelveInsight Projects

*DelveInsight's Chemotherapy-Induced Pain Market report offers an in-depth understanding of the epidemiology and market trends in the 7MM.*

LAS VEGAS, NV, UNITED STATES,  
February 5, 2025 /EINPresswire.com/ --

The Chemotherapy-Induced Pain market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Chemotherapy-Induced Pain pipeline products will significantly revolutionize the Chemotherapy-Induced Pain market dynamics.

Chemotherapy-Induced Pain Market Trends

DelveInsight's "Chemotherapy-Induced Pain Market Insights, Epidemiology, and Market Forecast-2032" report offers an in-depth understanding of the Chemotherapy-Induced Pain, historical and forecasted epidemiology as well as the Chemotherapy-Induced Pain market trends in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan.

The Chemotherapy-Induced Pain market report covers emerging drugs, current treatment practices, market share of the individual therapies, and current & forecasted market size from 2019 to 2032. It also evaluates the current treatment practice/algorithm, market drivers & barriers, and unmet medical needs to curate the best of the opportunities and assess the underlying potential of the market.

Some of the key facts of the Chemotherapy-Induced Pain Market Report:

- The Chemotherapy-Induced Pain market size is anticipated to grow with a significant CAGR during the study period (2019-2032)

- According to a study conducted by Seretny et al., 31 studies with data from 4179 patients analyzed that the Chemotherapy-Induced Pain prevalence was 68.1% (57.7–78.4) when measured in the first month after chemotherapy, 60.0% (36.4–81.6) at 3 months and 30.0% (6.4–53.5) at 6 months or more
- As per Burgess et al., a large meta-analysis of 13,683 people with CIPN estimated the prevalence of neuropathic pain to be as high as 40%
- Key Chemotherapy-Induced Pain Companies: WEX Pharmaceuticals, and others
- Key Chemotherapy-Induced Pain Therapies: Halneuron, and others
- The Chemotherapy-Induced Pain epidemiology based on gender analyzed that Chemotherapy-Induced Pain was found more in the 1st month post chemotherapy than the 3rd and 6th month

### Chemotherapy-Induced Pain Overview

Chemotherapy-induced peripheral neuropathy (CIPN) is a disabling pain condition resulting from chemotherapy for cancer. Peripheral neuropathy usually manifests as painful symptoms, characterizing a neuropathic pain syndrome. Moreover, observed symptoms vary in intensity and duration and range from acute, transient thermal sensations to permanent changes in peripheral nerves accompanied by chronic pain and irreversible nerve damage.

### Chemotherapy-Induced Pain Market

The dynamics of the Chemotherapy-Induced Pain market are anticipated to change in the coming years owing to the expected launch of emerging therapies and others during the forecasted period 2019-2032.

“The unmet needs in management of Chemotherapy-Induced Pain and associated pain is the inadequate diagnosis and a lack of appreciation of the mechanisms involved; insufficient management of comorbid conditions; incorrect selection of treatment options; and the use of inappropriate outcomes measures.”

### Chemotherapy-Induced Pain Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2019 to 2032. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

### Chemotherapy-Induced Pain Epidemiology Segmentation:

The Chemotherapy-Induced Pain market report proffers epidemiological analysis for the study period 2019–2032 in the 7MM segmented into:

- Total Prevalence of Chemotherapy-Induced Pain
- Prevalent Cases of Chemotherapy-Induced Pain by severity

- Gender-specific Prevalence of Chemotherapy-Induced Pain
- Diagnosed Cases of Episodic and Chronic Chemotherapy-Induced Pain

#### Chemotherapy-Induced Pain Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Chemotherapy-Induced Pain market or expected to get launched during the study period. The analysis covers Chemotherapy-Induced Pain market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Chemotherapy-Induced Pain Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

#### Chemotherapy-Induced Pain Therapies and Key Companies

- Halneuron: WEX Pharmaceuticals

#### Chemotherapy-Induced Pain Market Strengths

- Important progress has been made regarding understanding disease pathology, diagnosis, and treatment effects in Chemotherapy Induced Pain
- Population rates of Chemotherapy Induced Pain in children and young people have been investigated in several countries
- Only few therapies are under investigation which include Halneuron.

#### Chemotherapy-Induced Pain Market Opportunities

- Identify and synthesize recent research findings in the etiology and psychological treatment of Chemotherapy Induced Pain
- Due to patients' poor quality of life with Chemotherapy Induced Pain, there is significant patient willingness towards expensive therapies

#### Scope of the Chemotherapy-Induced Pain Market Report

- Study Period: 2019–2032
- Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]
- Key Chemotherapy-Induced Pain Companies: WEX Pharmaceuticals, and others
- Key Chemotherapy-Induced Pain Therapies: Halneuron, and others
- Chemotherapy-Induced Pain Therapeutic Assessment: Chemotherapy-Induced Pain current

marketed and Chemotherapy-Induced Pain emerging therapies

- Chemotherapy-Induced Pain Market Dynamics: Chemotherapy-Induced Pain market drivers and Chemotherapy-Induced Pain market barriers
- Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies
- Chemotherapy-Induced Pain Unmet Needs, KOL's views, Analyst's views, Chemotherapy-Induced Pain Market Access and Reimbursement
