The rapid growth of the online tutoring services market is due to the opportunity for education in the digital marketplaces. Students of all age groups are now looking for personalized solutions for learning due to the increased accessibility through the internet, more and more mobile devices, and an increased number of tools gaining grounds for e-learning.

By Tutoring Type: On-Demand Tutoring Dominates, Structured Tutoring Registers Fastest Growth

On-demand tutoring segment dominates the online tutoring services market and accounted for a revenue share of more than 75% in 2023, as of today owing to its flexibility and convenience. It is a great option for students seeking instant help with particular problems or subjects as they have access to a tutor when needed. This approach furthers the growing trend of learners seeking personalized, flexible learning of their choosing.

By Course Type: STEM Courses Dominate, Language Courses Register Fastest Growth

The STEM segment dominated the market and accounted for a revenue share of more than 44%. Due to the increasing trend towards technology and innovation, STEM subjects are in high demand. Due to this, students looking for expertise in this sector are flocking to online platforms for specialized tutoring. However, the segment of language courses will likely record the highest CAGR.

By Duration: Long-Term Courses Dominate, Short-Term Courses Register Fastest Growth in 2023

The online tutoring services market has a majority of long-term courses, as one can get tutoring for a longer period to achieve academic success in school over a longer duration. These courses are often linked to academic curriculums, standardized tests, or special skills development programs.

Regional Landscape, North America's Dominance, and Asia-Pacific's Rapid Growth in 2023

North America dominated the market and accounted for 37% of the revenue share, as the internet is highly penetrated, usage of digital education tools is increasing all over the region and also people over there are more inclined towards flexibility when learning.

Asia-Pacific is projected to register the fastest CAGR during the forecast period. The new growth in online education over an immense number of students adding to it is happening in nations

where the majority can bear the cost of this sort of schooling, for example, India and China.

Recent Developments in Online Tutoring Services (2024):

In January 2024, Chegg introduced new interactive features in its online tutoring platform, including real-time collaboration tools and virtual whiteboards for improved student-tutor interaction.

In 2024, Khan Academy integrated AI-powered features to enhance its online tutoring services. The platform now offers personalized learning experiences, making use of AI to provide students with tailored lessons and real-time support.
