By End User

- Hospitals and Clinics
- Ambulatory Surgical Centers
- Homecare

By region, the market across North America held the largest share in 2021, accounting for more than two-fifths of the market, and is projected to continue its dominance throughout the forecast period. This is due to high adoption rate of technologically advanced products, increase in healthcare expenditure, and presence of major key players involved in the R&D activities.

However, the global silver wound dressings market across Asia-Pacific is expected to register the highest CAGR of 6.8% during the forecast period, owing to rising population in the countries such as India and China, high prevalence rate of road accidents, and chronic disease. In addition, the increasing patient awareness about the beneficial properties of silver-incorporated dressings such as their antimicrobial nature, reduction in healing time, and low infection risk are expected to further drive the market growth.
